Heart to Heart ♥

How Must We Then Live?

I have the joy of watching my grandchildren. It is a joy, but the vigilance is constant. The attention I must give them is 100 per cent. They are Owen who is 1½ and Liam who is 3 ½ years old.

To see them interact is so amazing. One minute they are joyfully playing, the next minute they are crying and at odds with each other. . . I don't know how my daughter does it. She is constant, patient, kind, gentle. But of course she is a Mom with Jesus as her guide and has the incredible husband Jarret to support her. That is the foundation of the Christian life with Mom and Dad. It is rigorous and requires great faith and strength.

I have been studying the book of Acts. In chapter 18 we learn about Aquila and Priscilla. They are married and never mentioned in scripture without the other. They are tent makers and lived with the apostle Paul for over a year. When we home school, Mom and Dad are a team. We support each other like Aquila and Priscilla supported Paul in his ministry at Corinth. The apostle Paul had more influence in preaching the gospel than anyone else other than our Lord Jesus. We have tremendous influence on our children as well. They all have a destiny and teaching the Bible to our children equips them to face the challenges of life like nothing else will. In Acts 18, one night the Lord spoke to Paul in a vision and encouraged him that he should:

1. Not be afraid
2. Keep on speaking
3. Not be silent
4. Trust me. For I am with you and no one is going to attack or harm you, because I have many people in this city.

We must draw strength from the Lord and his word when we teach our own children. We must not be afraid or insecure. We must share with them all the things God is showing us everyday. We must trust Him with everything. We also need to take part in the home school community to be encouraged and strengthened by the saints.

God bless you all on your journey.

Love,

Marilyn

A Word to Fathers ~

By Bill Stephens

Two Temples

In 1 Corinthians Paul talks twice about temples. In 1 Corinthians 3:16-19 he says, “Do you not know that you are a temple of God and that the Spirit of God dwells in you? If any man destroys the temple of God, God will destroy him, for the temple of God is holy, and that is what you are.” Then, in 1 Corinthians 6:19 Paul says, “Do you not know that your body is a temple of the Holy Spirit who is in you, whom you have from God, and that you are not your own? (17) For you have been bought with a price; therefore glorify God in our body.

The two “don’t you know” scriptures about temples seem very similar and most people think that both speak of the personal human body as the temple of the Lord. But the first temple Paul is speaking about is concerning the church, the second scripture is dealing with the physical body. A temple in Roman times was an extravagant place to visit. Herod’s temple was even more extravagant. For Paul to compare a motley crew of people meeting in a house worshipping a crucified Jew to one of the great temples of that period was almost laughable. But Paul was seeing the Church with spiritual eyes. He saw the Holy Spirit dwelling in the midst of the assembly which made the assembly of believers exquisitely beautiful. Paul saw the human body indwelt by the Holy Spirit with that same beauty.

Christians exist in two worlds. We live in the physical world and the spiritual world. How do we bring these worlds together and minimize the conflict? The answer is to keep your focus on the two temples. I have seen many men fall away from the Lord. The outward sign seems to begin with neglecting their church responsibilities. The inward falling away begins by giving in to sin. As a father, you need to honor both the church and your body as dwelling places of the Holy Spirit. If you stay obedient to God, be involved in your local church, you will greatly increase the chances that your children will be strong Christians.

Park Day

Park Day is one of the best times for moms and kids to gather for fellowship and fun!

Contenders For the Faith

Contenders For the Faith is a boys group for grades K-8th grade. The group is designed to help the boys learn new skills, grow toward being a righteous man, make friends, and have fun!

We are studying a variety of subjects depending on the age group. We have many fun Father/Son outing for the boys to have time to bond with their dads as well as with each other and family outings during the year.

We are a parent lead group! We are looking for a few moms, dads or high schoolers (for service credits) to join us to help run the program. Positions like group leaders are vitally needed right now as well as child care and event coordinator. Space is limited in the group and all parents are asked to help in some way. For parents involved in leading Contenders we do offer and Pre-K Little Contenders / Keepers group for boys and girls.

Cost: \$50.00 supply fee **PLUS** the cost of materials which will vary depending on the age of your child.

Annual Homeschool Fair of Southern California Memorial Day, May 28, 2012

The Fair is held at Ontario Christian High School and is a great opportunity for your students to display their talents and accomplishments over the school year. Fair Day provides many educational, entertaining, and hands-on activities for families, too! There are also opportunities to promote a business, service, or fundraiser you may be involved in. Please visit www.homeschoolfair.com for details about project divisions, deadlines and registration; a flyer is also available for you to download and print. If you've never attended, consider checking it out this year!

JET PROPULSION LABORATORY (JPL)

TUESDAY, JUNE 5TH. Kids entering the 3rd grade in the fall – 12th grade. Join us on this 2-2 ½ hour guided tour of the JPL facility. The tour will include a multimedia presentation on JPL entitled "Journey to the Planets and Beyond," which provides an overview of the Laboratory's activities and accomplishments. You will also visit the von Karman Visitor Center, the Space Flight Operations Facility, and the Spacecraft Assembly Facility. The walking distance for the tour is approximately 0.8 miles with multiple flights of stairs. Dress for the weather as the tour is indoors and outdoors and will proceed rain or shine. **Please read the following information carefully – it is important:**

- 1) All US citizens 18 years of age or older visiting JPL **MUST** present official, government-issued photo identification, such as a driver's license or passport, before being allowed entry.
- 2) Federal security requirements insist that we provide a roster of people attending ONE MONTH before the tour. Full name and country of citizenship for all adults, and full name for those under the age of 18 is required. Anyone not on the approved roster will not be allowed on to the facility. Substituting roster names the day of the tour is not allowed.
- 3) All non-US citizens (Foreign Nationals) 18 years of age or older **MUST** present either a passport or resident visa (green card) before being allowed entry. Individuals without the appropriate identification will **NOT** be admitted to the facility.
- 4) The tour includes considerable walking and stair climbing. Dress comfortably and appropriately for the weather. Cameras are allowed on the tour.

TIME: Please arrive by 12:40 pm and wait outside the front entrance to the visitor reception building (they request that groups not fill the visitor reception center). The tour will begin at 1:00 pm.

COST: \$1.00 per child and \$1.00 per adult. Please make your check payable to CCL and write in the memo area "JPL". You can also pay in cash at the school sites or Park Days.

COORDINATOR: Please RSVP to Denise Kross at kd_kross@yahoo.com or 909-949-7057 on or before **Monday, April 30th**.

The roster with required info needs to be submitted by May 4th. When you sign-up, please include the full name and citizenship of each adult and the full name of for kids under the age of 18.

Tuesday Classes @ Community Baptist Church

9090 19th St., Rancho Cucamonga, A 91701

Grades K—6

NEW WRITING CLASS OFFERED NEXT YEAR FOR TUESDAY SCHOOL IN RANCHO CUCAMONGA!

The K-2 grades will be doing a session on “Teaching Character through Literature” similar to the Beautiful Feet study guide. We’ll be reading, drawing, and writing or tracing simple Bible verses or stories. The 3-8 grades will be using the same type of character based literature books while learning the IEW (Institute for Excellence in Writing) skills. The students will be putting together a binder and learning basic writing skills, using IEW methods. More details to come...

Art ~ Teacher: Christy Miller

In this session of Tuesday School the kids will learn about an artist from an interesting book showing many photos of the artist's work and then we will create a piece of art similar to what that artist made. Some of the weeks we will need two Tuesdays to complete our artwork, so hope you can make it to each class. For those of you who have been in my Friday School First Grade class, we will be doing different projects. Looking forward to teaching your students!

Science ~ Teacher: April is a "retired" elementary school teacher who is homeschooling her 7 and 9 year-olds. Christian homeschooling is her passion. She holds a Master's degree in Social Psychology, where her focus was children's socialization.

We will be using Apologia Science—a wonderful, creation-based curriculum. K-6th grade will study human anatomy and physiology, using exciting activities and experiments to explore our body systems, senses, blood and cells. 7th and 8th graders will take an in-depth look at the scientific method and experiment design through the study of simple machines, archaeology, geology, biology and more!

PE ~ Teacher: Lynn Murray BS Physical Education California Teaching Credential in PE

Tuesday School’s Physical Education Class will have the wonderful opportunity to be inside using a gym! This class involves basic movement principles which will be incorporated throughout each class meeting, particularly in teaching skills which are specific in various games and sports. Selected activities will show a balance between individual and team emphasis, with having a gracious attitude and sportsmanship always strived for. Physical Fitness will be addressed in every session during warm-up and the California Benchmarks and Standards will be covered. Each class will include skill instruction, a variety of drills and a FUN lead-up game which will be sequential through the specific unit. Kids should wear clothing that they can PLAY in and shoes they can RUN in. Each class is also designed to emphasize the motor development of that particular age level and lots of Fun for ALL!

Friday School Center for Creative Learning 2011—2012

@ Chino Valley Community Church

14601 Peyton Drive Chino Hills CA. 91709

A program to enrich your child in developing art, science, music and physical movement. Our purpose is to love, support, and serve each other, the parents, and the children, with the love of Jesus Christ. We want to enrich the home school experience of children by teaching these extra curricular activities as well as providing a chance to bond with other children through constructive social contact.

Chapel — Students and parents meet together for worship and a devotional. Student leaders are being developed as we create worship teams with praise team leaders. We also listen to God’s Word through parent speakers. (Parents are encouraged to participate in chapel through worship and listening attentively to speaker. Sitting with children is recommended.)

K—3: Classes include various activities that create a joyful classroom experience that incorporates science, history, cooking and PE. A weekly theme pulls everything together to make this a fun time for your student.

Physical Education involves basic movement principles which will be incorporated throughout this class, particularly in teaching skills which are specific in various games and sports. Selected activities will show a balance between individual and team emphasis, with a good attitude and sportsmanship always at the top. Physical Fitness will be addressed in every session during warm-up; skill instruction, a variety of drills and FUN lead-up games will be the sequence of each class. Kids should wear clothing that they can PLAY in, and shoes they can RUN in. Each class is designed to emphasize the motor development of that particular age level and be lots of FUN for ALL!!!

Science-A lab based class centered around creationism. It introduces the student to basic scientific concepts through lectures, teacher-student interaction and, of course, experiments. Some of the past subjects taught have included astronomy, chemistry, physics, botany and entomology.

Art-This class will be an Introduction to a handful of different art mediums. Students will experiment with sketching, pastels, watercolors and cartooning. This class is designed to meet the students’ different ranges of skill and interests through a series of assignments, home projects as well as keeping a sketchbook throughout the session. My goal for the class is for the students to unleash their creativity, develop their skills, gain knowledge and confidence in the arts, and do all of the above while having FUN!

Chapel meets upstairs in the youth room

Children will be excused to teachers after chapel and teachers will take students to classroom

Please provide your child with a snack.

The library that is right on campus will be open between 8:30 am—12:30 pm every week. You can check out books, movies or just read and relax.

For those of you who need somewhere to go other than the above options while Friday School is in session there are many options in the area from shopping, and eating to parks and gyms. Please go to the front table for a map.

There are a few rules that we need to abide by while on the campus:

Please remember that we are guests and we should try our best to be a blessing!

Please no wheels in shoes inside the building.

Please no gum, food, or drinks in the building. (But, remember to bring snacks for a specified snack time!)

Please do not touch any equipment that doesn’t belong to you.

Please stay only in the designated school areas.

Please do not use the elevator unless needed...stairs are outside the building.

Thank you. I know this will be a great year for our group!!

Writing/Grammar I through U.S. History (Explorers to the Gold Rush)

This is a full year course for 6-10th graders. It is a class for students who have not taken a writing class previously or are not familiar with the basic EIW elements. The class will cover vocabulary, grammar, editing, public speaking and poetry using sources that focus on this time period in history.

Material: Three ringed binder, dividers

Location: Chino Valley Community Church

Teacher: Karen Greek 909.986.7158 or webksg@verizon.net

Writing/Grammar II through U.S. History (Civil War Era to the Present Day)

This is a full year course for 6th-10th graders. It is a class for students who have taken Writing and Grammar I or have had previous experience with EIW and know the elements included in this program. This class will also include vocabulary, grammar, editing, public speaking and poetry using sources that focus on this time period in history.

Materials: Three ringed binder, dividers, packet from Writing I, and the novel Animal Farm

Location: Chino Valley Community Church

Teacher: Karen Greek 909.986.7158 or webksg@verizon.net

American Literature:

In this junior level course students will study the great American writers such as Jonathan Edwards, Hawthorne, Washington Irving, Twain, and many others. Students will enhance their critical thinking skills and develop their understanding of American Literature within a biblical worldview. Our weekly class sessions will provide a time of interaction between the students and teacher where they will engage in meaningful discussions about the material and participate in group projects and collaborative assignments. This class will include composition, novel reviews, timed writings and thesis statements.

Physical Science

This is a full year high school credit class. 8th graders can take the class for high school science credit as well. Topics covered will include: the atmosphere, oceanography, earthquakes, volcanoes, geology, chemistry and physics. This is a foundational science course that prepares your student for upper level science. It includes laboratory experiments that reinforce topics. We will be doing a science project and presentation in the second semester. (minimum 7 students needed)

Spanish I

This is a full-year, high school level course. We will learn basic conversation, as well as Spanish grammar and usage. We will also be introduced to various Latin American cultures. There will be homework every week and a test about every three weeks.

Text: Spanish I from Bob Jones University Press (I use 2nd edition, but 1st edition will work as well.)

Bring: 3-ring binder with 4 tabs

Place: Chino Valley Community Church

Instructor: Lori Fischer Email: lori@5fischers.org (please contact via e-mail only. Thanks.)

Spanish II

This is a full-year high school level course. We will continue where we left off with Spanish I reviewing present-tense and preterite tense verbs before moving on to other tenses. There will be homework every week and a test about every three weeks. As time permits we will include games in our class time to help us review what we've learned. Bring: 3-ring binder with 4 tabs; 1 pack 3x5 cards with card file box.

Government/Civics & Economics

This class will survey the American government system. It includes studying the foundations of our government, the Constitution, and three branches of our government, political parties and civil rights. It will help the student to comprehend and analyze the significance of current political events as well as stress the importance of citizen participation in our system of government.

In economics the course will look at the study of the choices and decisions people make about how to use the world's resources. It will cover aspects of supply and demand, world economic systems, the American free enterprise system, prices, market structures, business organizations, the stock market, GDP, taxes, banking and fiscal and monetary policy.

THIS CLASS BEING OFFERED IN POMONA AND IN CHINO HILLS, IF DEMAND SUPPORTS.

This is a full year, high-school level course. Begins with a very extensive review of basic mathematical terms and rules, working with integers and real numbers. Moves into the vocabulary of Algebra, solving equations and inequalities, relations, functions, and graphs, systems of equations and inequalities. Then covers working with polynomials, and factoring them, dealing with radicals, quadratic equations, rational expressions and equations. Students will learn concepts in class, then complete daily assignments at home. Daily homework to be corrected by parent and/or student. Unit tests will be sent home, to be administered (per instructions) by a parent or homeschooling teacher, and brought back to the next class session. TEACHER'S EDITION REQUIRED-- Parent(s) welcome and encouraged, but not required, to accompany students to class, in order to support study during the week.

a placement exam must be completed prior to enrollment - call or e-mail ASAP

This is a full year, high school level course - STUDENT MUST HAVE COMPLETED AT LEAST ALGEBRA I PRIOR TO ENROLLMENT - I do recommend, for most, that students take Alg 2 the year immediately following Alg 1, if they are intending to do BOTH classes - Alg 2 content relies HEAVILY on Alg 1 content!!

This is a presentation of Algebra as an exercise in stewardship of creation, developing thinking skills and Christ-likeness . . . wow! Chapter 1 dives right into factoring polynomials, binomials, and trinomials, assuming a pretty strong mastery. Text moves through linear equations and inequalities, linear relations, quadratic equations and functions, graphing, linear programming, radicals and exponential functions and equations, imaginary and other complex numbers, rational expressions and equations, trigonometry, and matrix algebra. Students will learn concepts in class, then complete daily assignments at home. Daily homework assignments will be corrected by student or parent. Unit tests will be sent home, to be administered by a parent or instructor, and brought back to the next class session. TEACHER'S EDITION REQUIRED -- Parent(s) welcome and encouraged, but not required, to accompany students to class, in order to support study during the week. The subject matter here is complex - TOO complex for a once a week class. It will be **TWO (2) days per week**, though there may be a FEW Friday classes that we DON'T hold (due to holiday schedules, etc).

Materials: 3-ring binder and paper, ruler (inches and cm), protractor, compass (call before buying!), and a scientific calculator . (graphing calculator NOT necessary)

CONSUMER MATH (Grades 11-12)

Text: Consumer Math (2nd edition) BJU Press softback ISBN# 1-57924-892-6
(2005 publish date) teacher's ISBN# 1-57924-893-4

This is a full year, high school level course - a God-centered, Scripturally-based approach to stewardship, and the financial transactions that are encountered in every-day grown-up real life. Based on the five essential principles for the consumer: 1) plan ahead 2) shop for bargains 3) maintain the value of your belongings 4) know when to borrow, and 5) keep accurate financial records.

Will cover such things as income and tax deductions, budgeting, personal banking, borrowing money, transportation costs/investments (buying and maintaining a car), food costs and budgeting strategies, clothing costs and budgeting strategies, housing costs and budgeting (including home purchases and maintenance), life and health insurance, income taxes (including completion of the basic tax forms), and vacation planning. (whew!)

These are BASIC LIFE SKILLS that everyone needs, and few, at this time in their life (or ever) are given adequate instruction on! Students will learn concepts in class, then complete daily assignments at home. Unit tests will be sent home, to be administered by a parent or instructor, and brought back to the next class session. TEACHER'S EDITION REQUIRED -- Parent(s) welcome and encouraged, but not required, to accompany students to class, in order to support study during the week (or to learn alongside their student!). Parents or students will correct the daily work.

Math concepts will be basic, but there's quite a bit of it!! -- at least completion of a Pre-Algebra class would be wise. Ratios, Percentages, basic equation solving, and measurements (including conversions) will be COVERED, but a basic knowledge would be good . . . This is a great math option for the student who is NOT strong in math skills, but needs to get the required classes in for graduation, as WELL as being a terrific life-skills course for ANYONE, including the mathematically gifted :-). Recommended for students who are seniors, especially before they "head out into the world".

This is a full year course. Will cover skills required to proceed into High School Algebra, and students completing it will be WELL PREPARED for Algebra 1.

**I get asked often, which math should my Jr Higher be doing?" If your student does a decent job (80% average) on basic mathematics, especially multiplication & division, and maybe ok on fractions, he/she should take Pre-Algebra. The current "fashionable" trend in education these days (public and private) is that students should take Algebra I in 8th grade, which would mean Pre-Alg in 7th. This works for some, and is (in my opinion) a GRAVE mistake for a lot of others! According to Bob Jones, this is an 8th grade curriculum.

This class is available, as well, to High School students who require additional work on the basics!

Call me if you need to talk about any of this!

Starts right out working with equations, covering properties of addition, subtraction, multiplication and division. Will move into decimals, integers, multiples, factors, fractions, equations and inequalities, ratio, proportion, percentages, geometry and graphing. Emphasis through entire text is on equations and solving them, using all the mathematical concepts introduced. These basic skills would be prerequisite for an Algebra course. Students will learn concepts in class, then complete daily assignments at home. Daily homework to be corrected by parent and/or student. Tests will be sent home, to be administered by a parent or homeschooling teacher, and brought back to the next class session. SAT PREP PLUS

This one-semester class is designed to prepare students for success in taking the college entrance SAT test which includes math, critical reading, and essay writing. Career and college preparation will be studied through assessments of spiritual gifts and personality types. We will research colleges, universities, and career programs as well as exploring financial aid opportunities. Although geared toward juniors and seniors, this course is open to any student who has successfully completed geometry. Contact Amy Miller for more information: amyamykatekate@yahoo.com.

*****Public Speaking I**

In this one-semester course, we will learn to express our beliefs and ideas to a variety of audiences. Lessons will include audience analysis, peer critiques, humorous interpretations, persuasive speeches, impromptu speeches, interpretation of current events, and much more. Students will have the opportunity to share at our Friday School Chapels as a practical application of skills learned. The class will include quizzes and tests and there will be a grading rubric for presentations. I will be using the Bob Jones Materials in conjunctions with curricula from Thersa Moon. This class counts for 5 units of elective credits.

Depending on interest, a second semester, Public Speaking II will be offered, focusing on acting, storytelling, and interview skills as well as interpreting literature.

NEW THIS YEAR!! Modern World History

In *Modern World History* we will not only be studying historical events, we will also be studying the meaning of the world's history. As Christians we believe we are all on a journey to the end of time. The Christian historian therefore, has great hope concerning the journey of man, his own journey in history, and the end of time. As believers in Christ we acknowledge that God is active and at work in the world and in history. We also believe it is important for us to examine how and why different events happen, how they are connected to us today, and how they relate to our salvation. In order to really understand history and our place in it, we will pay special attention to the philosophy and theology that go along with that history. In order to explore the root of things that happen, the Christian historian must include philosophy and theology in his study. If he does not, then according to philosopher and historian Josef Pieper, he "is altogether unable to attain a serious view of the totality of history."

Cost: \$150 per semester

Materials: to be determined
